Lewens
MARKISEN

Successful sunshade products since 1998

Based in Ludwigslust, Lewens has been manufacturing high-quality awning and glass roof systems for over 20 years. These range from simple to complex to meet every requirement.

The development of models and equipment options is influenced just as much by current trends as by the wishes and suggestions of specialist dealers and customers. This is how product series like the full cassette awnings featured here come into being: the Trentino and Toscana model families, both with an unmistakable appearance and unique shape, are characterised by their innovative design and high level of functionality.

Production takes place in a fully integrated operation - from the design and making up of the fabric to assembly – on a site covering over 30000 m². High-grade materials, well thought-out design and precision in cutting and parts production, together with computer-aided automation in the manufacturing process, form the basis for products distinguished by their extreme reliability.

Consultancy and sales are entrusted to competent retailers, along with installation and on-site servicing. This creates proximity to the customer and ensures optimal service, so that our customers can just enjoy life!

Quality "made in Germany":

*all awnings and glass roofs from Lewens are
manufactured and assembled in Germany.*

Just
enjoy life!

Toscana Grande

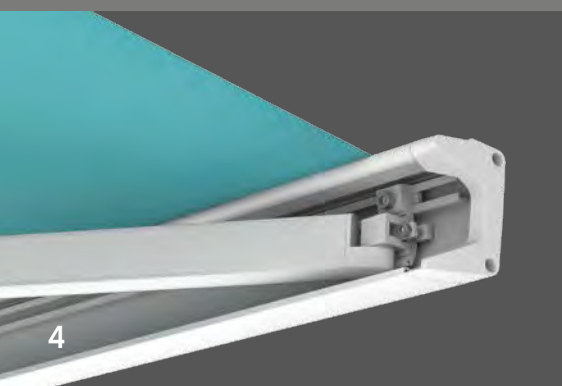

Comfort on a small scale

- Width max. 450 cm,
drop max. 250 cm
- Snug wall fitting
- Cassette H 11.8 x D 20.9 cm
- Electric motor
- Options:
Radio motor/
radio remote control,
automatic weather sensor,
LED lighting,
support legs

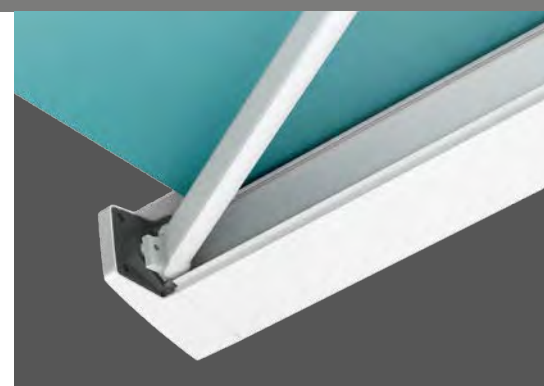

Trentino Mini – the small flat cassette

Full-cassette awning for balconies and small outdoor seating areas

Function enhanced by design
– the connection of folding arms
to front profile

Elegance and stability
– the arm brackets

The **Trentino Mini** creates a snug seating area and adds a splash of colour to small patios.

The angular design of the Trentino Mini creates a particularly harmonious combination with modern geometrical architecture and current trends. Like the large models in the Trentino family, the Trentino Mini offers a high level of comfort and superior quality standard. It can be equipped with a variety of optional extras.

Full cassette

Enclosed all around and measuring just 11.8 cm in height, the cassette reliably protects the awning from the effects of the weather.

*Vario Valance (option, see fig. right)
The Vario Valance offers variable shade
from the sun and glare protection,
especially when the sun is low in the sky,
without any loss of headroom
under the awning.*

Trentino – the flat cassette to suit every style

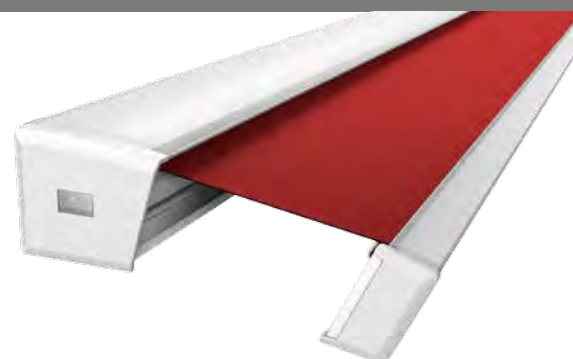

Full-cassette awning for large patios and outdoor seating areas

Angular type

*The clean shape of the angular front profile
creates a particularly harmonious
combination with modern façade design.*

Cassette: H 161 x D 261 mm

Equipment

- Width of single unit max. 700 cm, joined system max. 1.950 cm, drop max. 400 cm
- Snug wall fitting
- Electric motor
- Options:
Radio motor/
radio remote control,
automatic weather sensor,
LED lighting,
radiant heater,
support legs,
Vario Valance (Angular type)

Trentino Rounded

With its rounded front profile this awning type blends harmoniously into the façade of traditional classic architecture.

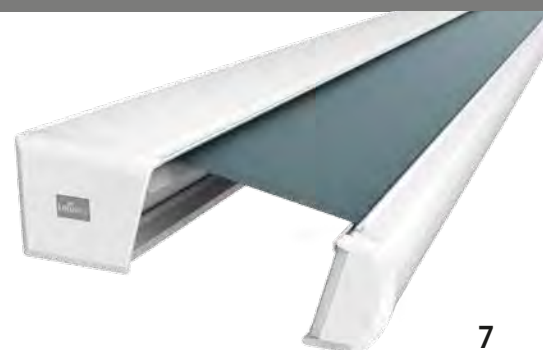

The Angular and Rounded model variants of the Trentino full-cassette awning offer versatile design options for large patios and balconies. The Angular type with its linear, angular front profile forms the perfect complement to modern geometrical architecture, while the design of the Trentino Rounded model was developed with classical construction styles in mind.

Rounded type

The rounded front profile with its soft contours sets the right tone for traditional construction forms.

Cassette: H 161 x D 252 mm

Toscana Mini – the small round cassette

Space-saving elegance for balcony and loggia

Attachment

The awning is delivered optionally with brackets facing to the rear (for wall mounting) or upwards (for ceiling mounting). The brackets are located on the outside of the awning in the area of the arm brackets.

Compact yet classy

- Width max. 450 cm, drop max. 250 cm
- Electric motor
- Options:
Radio motor/
radio remote control,
automatic weather sensor,
LED lighting,
support legs

Shade and privacy

Due to the special design of the Toscana Mini, a larger pitch angle can be set during assembly:

Possible pitch angles::

Mounting	Wall	Ceiling
Motor drive	5 - 60 °	5 - 60 °
Crank drive	5 - 27 °	5 - 60 °

Developed especially for small balconies and areas of shallow depth, the Toscana Mini awning boasts sophisticated technical details and comfort options.

The smallest full-cassette awning in the Toscana series turns even the smallest balcony into a favourite bolt-hole to relax in. The design of the Toscana Mini permits a steep pitch angle on installation, meaning that it offers privacy and shade even when the sun is low in the sky.

Full cassette

The compact cassette, just 10.5 cm high, protects the awning fabric reliably against the effects of the weather when closed.

Mounted on the wall or below the ceiling, the Toscana awning creates a light, floating impression.

The wide range of awning fabrics from the Lewens collection and choice of frame colours create endless combination and design possibilities.

Toscana – playful airiness

A classic for balconies and medium-sized patios

Attachment

The awning is supplied optionally with brackets facing to the rear (for wall mounting) or upwards (for ceiling mounting). The brackets are located on the outside of the awning in the area of the arm brackets.

Equipment and extras

- Width max. 550 cm,
drop max. 300 cm
- Electric motor
- Options:
radio motor/radio remote control,
automatic weather sensor,
LED lighting,
support legs

Shade and privacy

Due to the special design of the Toscana, a larger pitch angle can be set during assembly.

The awning thus offers privacy and shade even when the sun is low in the sky

Possible pitch angles:

Mounting	Wall/Ceiling
Motor drive	5 - 80 °
Crank drive	5 - 45 °

As an award-winning classic design from the house of Lewens, the Toscana embodies timeless elegance and adds a stylish touch to any balcony or patio. A particular highlight is that the Toscana can be fitted with an especially large pitch angle, thereby creating additional shade and privacy.

Full cassette

The 13 cm high cassette protects the awning reliably against the effects of the weather when retracted.

Toscana Grande – large-scale shade

The ultimate in comfort for large patios

Full cassette

When the awning is retracted, the front profile closes the cassette completely, protecting both fabric and mechanism reliably from the effects of the weather.

Equipment options to increase the comfort

- Width, 1 unit, max. 700 cm, joined system max. 1950 cm, drop max. 400 cm
- Electric motor
- Options:
Radio motor/radio remote control,
automatic weather sensor,
LED lighting
radiant heater,
support legs,
Vario Valance

Lightness on a grand scale

Up to a width of 650 cm, the Toscana Grande is attached to wall or ceiling using just two brackets (illustration on the left).

The bracket attachment is variable thanks to specially developed casing holders, which permit a lateral tolerance on installation

Vario Valance (option)

The Vario Valance offers variable shade from the sun and glare protection, especially when the sun is low in the sky, without any loss of headroom under the awning.

The biggest full-cassette awning in the Toscana series with a self-supporting, oval casing presents a convincing combination of compactness and elegance and is especially suitable for large patios. When mounted on wall, ceiling or rafters, the Toscana Grande appears to float, radiating a notable lightness, even in large formats or as a joined system.

Privacy

The optional Vario Valance also guards against unwanted attention from outside. If Soltis woven fabric is selected, the view outwards is retained.

Quality and technology made in Germany

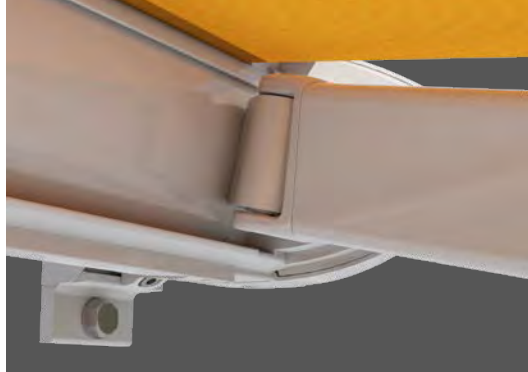

Thanks to their clean design, quality and a variety of equipment options, full-cassette awnings from Lewens make a convincing impression. Centimetre-accurate manufacturing, even in intermediate sizes, ensures a perfect fit in virtually any desired location.

Full-cassette awnings are folding arm awnings with a self-supporting casing.
They are therefore especially compact and space-saving.
Enclosed all round, they protect the retracted awning and mechanism reliably from the effects of the weather.

Durable and robust:

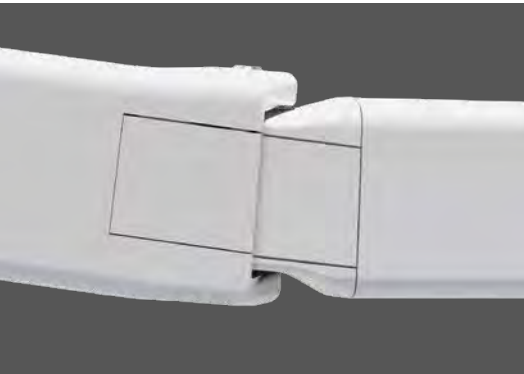

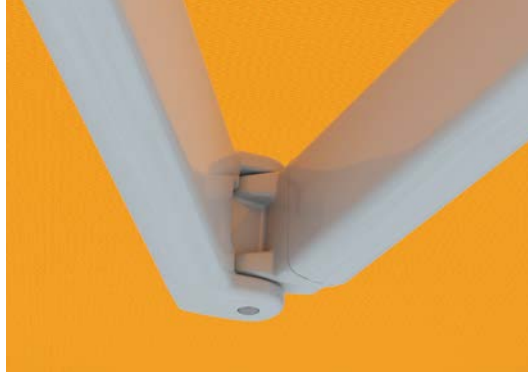

Arm bracket of high-strength aluminium alloy, upper arm fork of forged aluminium.

The **front profile bracket** connects the arms securely to the front profile and permits easy adjustment of the angle.

Central folding arm joints

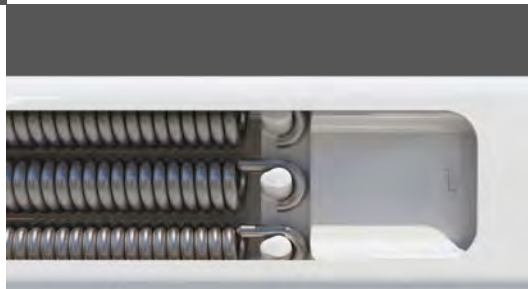

A plastic sheath prevents soiling and corrosion of the double cable in the central folding arm joints and extends its service life.

All double cables are greased for improved running with less friction.

The axle pins of the hinges consist of stainless steel.

The extremely high **spring tension** of the folding arms guarantees a superbly taut sit of the fabric and largely prevents the awning fabric from resting on the arm hinges.

Guaranteed quality

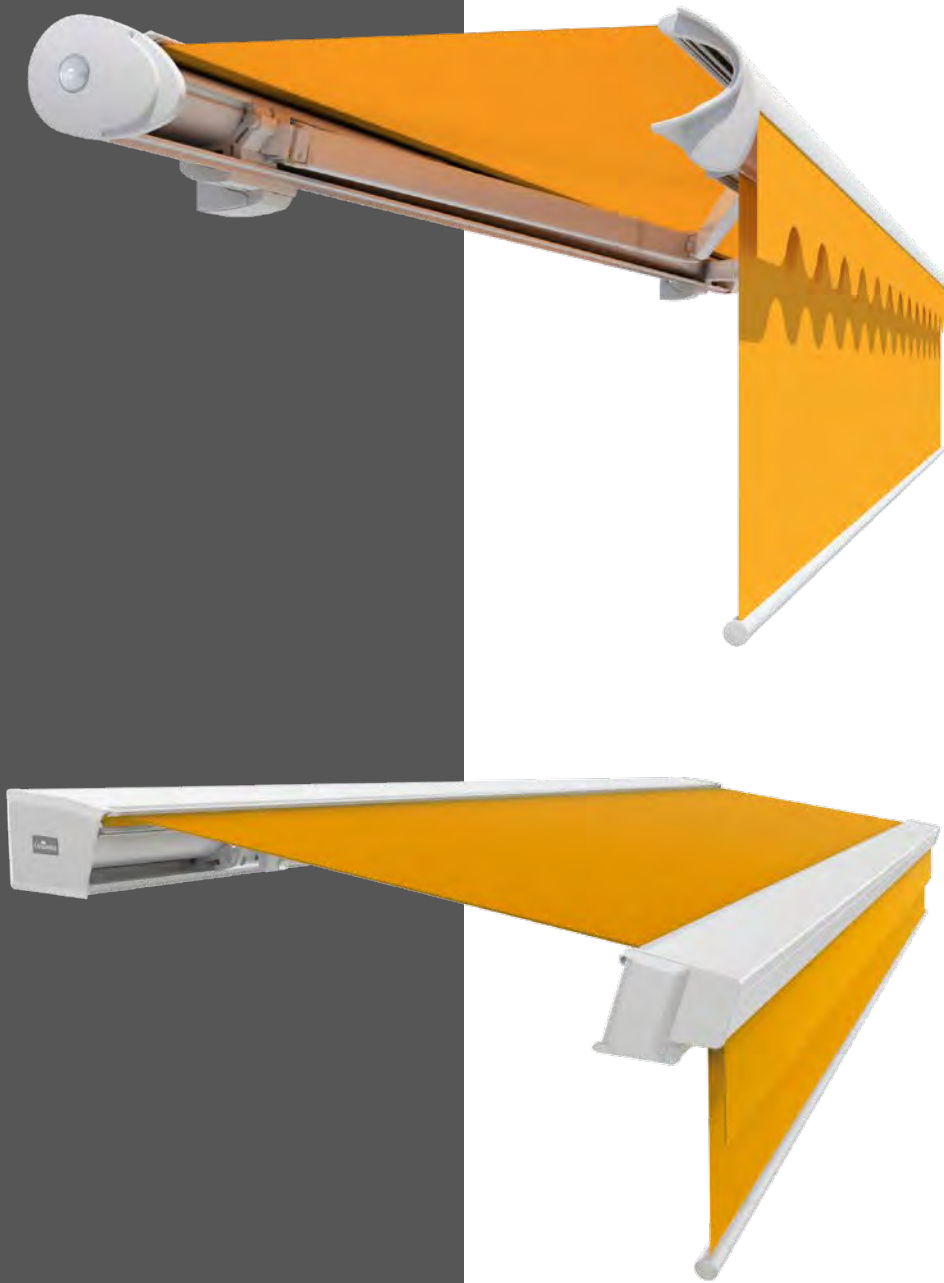

TÜV-tested quality and CE standard:

Look out for the seal and the mark guaranteeing the technical safety of our products.

Branded goods from Germany:

Lewens awnings are manufactured and assembled in Germany – quality “made in Germany”!

Models

- Toscana Grande
- Trentino

Standard equipment

- Supplied as standard with crank operation and acrylic awning fabric
- Hanging heights: 150 and 200 cm
- For awnings up to a max. width of 600 cm
- Max. drop of 350 cm possible up to 500 cm wide, max. drop of 300 cm possible up to 550 cm wide and from 589 to 600 cm wide (3 arms!)
- Always with additional short valance

Extras

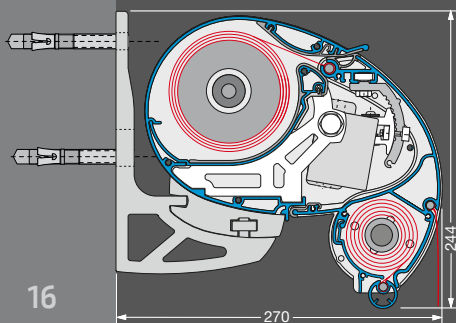

surcharge]

- Polyester fabric (valance lengths 150 and 200 cm) or Soltis 92 (valance length then approx. 160 cm)
- Vario valance with radio-controlled motor (only for awnings with radio-controlled motor; valance length then 150 cm in acrylic/polyester and 160 cm in Soltis 92)

Not in connection with radiant heater.

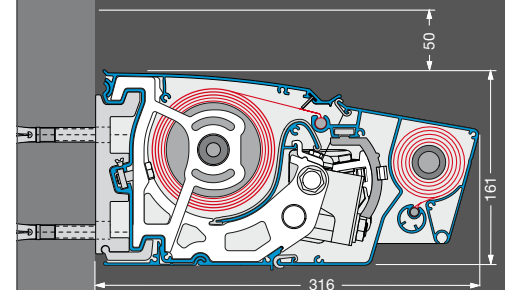

Vario Valance Option

The Vario Valance offers variable shade and privacy while retaining the headroom below the awning. When the awning is retracted, the Vario Valance can also be used as a window blind, creating shade and a cool climate inside.

Toscana Grande
with Vario Valance option

Trentino
with Vario Valance option

Radio controllers in io technology from Somfy create the prerequisites for integrating all patio functions into the home automation system (TaHoma, Connexoon), with convenient operation by tablet or smartphone.

Automatic weather sensor
Sun and wind monitors and wind sensors to io standard ensure automatic, weather-dependent control of awnings – even when there's no one at home.

Infrared radiant heaters
to io standard provide cosy warmth under awnings and glass roofs, even on chilly days

Options

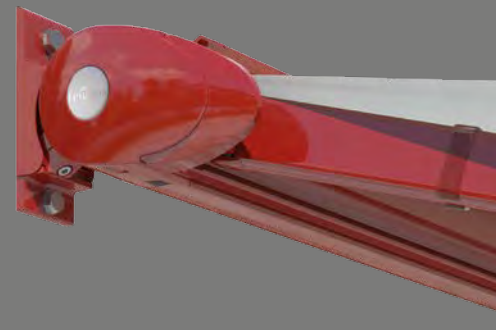

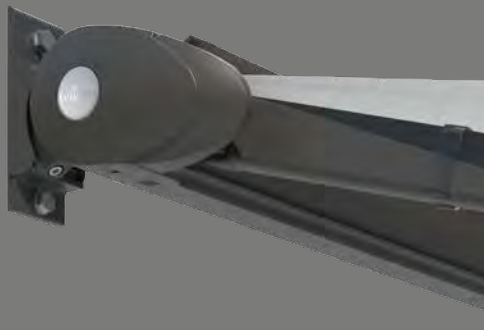

Electrical

Want more than the wall switch for operation and other comfort features too? Then you have the choice of radio control systems, lighting, radiant heater and automatic weather sensor components meeting the current Somfy io standard, which can be integrated into the home automation system (TaHoma, Connexoon). All patio functions can thus be conveniently operated via tablet or smartphone.

LED lighting
Equipped with a radio receiver for io technology, suitable mood lighting for any situation can be created by remote control or via the home automation system.

Frame colours to order

The frames of Lewens awnings and glass roofs are given a high-grade powder coating, rendering them particularly UV- and weather-resistant. An optional preanodising treatment increases the durability of the coating for products used in coastal regions. Hundreds of RAL colours and textured finishes are available to choose from, including a wide range of contemporary colours offered as standard at no extra charge.

E6/EV1
anodised

As well as powder-coated finishes, the frames of nearly all models are also offered in **natural silver**.

Finish: frame in **E6/EV1 silver anodised**, small components such as hinge parts, brackets etc. powder-coated in silver RAL 9006.

With well over 300 designs to choose from, the Lewens collection offers you high-quality, spun-dyed acrylic and polyester fabrics that retain their colour brilliance for a long time. Semi-transparent, glass fibre woven screen fabrics and Soltis 92 complete the range, which features modern and classic designs, solid colours, fine textures and 3D effects across the entire colour spectrum.

Lewens awning fabrics have been created especially for use outdoors and are treated to make them water- and dirt-repellent. We make the awnings up using the latest sewing techniques for distortion-free seams and also using ultrasonic bonding. We have designed our manufacturing facility so that the awning fabrics can be laid out entirely flat (not folded) for making up.

Some of our quality features:

- Secure lockstitch used for making up, optionally also with ultrasonically bonded seam (surcharge).
- Awning and valance are produced from one piece (identical repeat pattern)
- Seams on top and bottom and valance seam neatened (clean completion)
- Repeat-symmetrical completion left and right
- Use of Tenara® quality sewing yarn (also for valances)

Standard Option

The Micro 700 side screen awning provides shelter from the sun, wind and unwanted attention, creating a snug refuge on the patio, balcony or loggia. The Micro 700 complements the conventional sunshade in terms of function and design. The fabrics of all Lewens products can be perfectly coordinated with one another.

When the awning is retracted, the cassette can simply be removed from the bracket to prevent theft or vandalism and can be stored safely until it is next used.
